

# SMALL<sup>TM</sup> WORLD

INSPECTIONS

**The Playground Inspection  
APP that goes everywhere**

## The apps' wide ranging functionality will revolutionise the playground inspection and risk management industry

---

**THE SMALL WORLD INSPECTIONS APP IS DESIGNED FOR ROUTINE, OPERATIONAL, ANNUAL AND POST-INSTALLATION INSPECTIONS OF:**

- Outdoor and indoor playgrounds, including soft-play areas
- Multi-use games areas (MUGA's)
- Skateparks
- Parkour
- Outdoor gym equipment

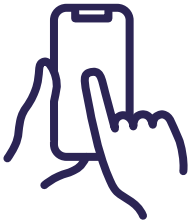

**THE SMALL WORLD INSPECTION APP CAN ALSO BE USED FOR:**

- Maintenance Reports
- Risk Assessment Reports
- Pricing Reports
- Bespoke Reports

# How it Works

## STEP 1

The Manager builds and schedules a report securely online on a desktop, with full control of the system and Inspectors.

## STEP 2

Inspectors log in using a smart device and visit their assigned site. They record all data for the inspection through the application, noting condition, appearance, and potential risk. Photographs can be taken, and are attached.

## STEP 3

When the inspection is finished, the file is completed by synchronising the app to the secure cloud server, where the report is held.

## STEP 4

The Manager has the access to the data through a secure connection, and can choose to retrieve both summarised or detailed compiled reports in its completed form at any time.

## STEP 5

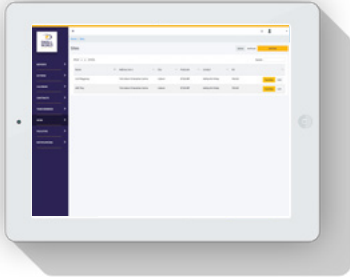

The generated reports can be emailed or printed out locally, as required, reducing the need for paper storage.

---

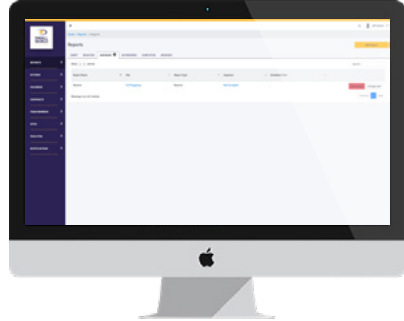

# The Benefits

- Easy to use interface
- Easy to setup
- Multiple inspectors
- Multiple managers
- Reduce paper storage
- Access anywhere
- Summary & detail reports
- Reduces accidents
- Helps defend any claims

# Ideal For

- Outdoor playgrounds
- Indoor soft-play areas
- MUGAs
- Skateparks
- Parkour
- Outdoor gym equipment
- Risk assessments
- A wide range of reports:
  - Post-installation
  - Routine
  - Operational
  - Annual
  - Risk Assessment
  - Pricing
  - Maintenance
  - Bespoke
